

LITERACY AUDIT

School Improvement
Services Department

Ensure that your school district has a comprehensive literacy plan in place guaranteed to provide high-quality curriculum and instruction that will meet the needs of all students in grades 4K to 12.

CESA 5 will engage in a strategic process to evaluate the current state of your district's literacy program. Based upon the audit results, we will make recommendations for improvement to the district's literacy program.

A preliminary leadership meeting will occur to determine the focus and scope of the audit.

Data collection will include classroom observations, interviews, resource reviews, and surveys.

A full report highlighting all components of the audit, including data and recommendations will be provided with the literacy audit.
