Air Gapped Backup Services

Air gapping is a security measure that is used to protect data from external threats, such as hacking or malware, and to ensure that the data is not accidentally erased or overwritten. Our solution provides data backups and testing of backups to make sure your data is protected, in case of an incident.

CESA 5 Offers...

- Air gapped back up solutions to be stored in secure lock boxes and transported by our CESA 5 delivery van.

- A choice of having backups tested weekly, monthly, or quarterly.

School Districts currently must use VEEAM or Microsoft Windows Backup software in order to use this service

Call Corey Koltz, Director of Technology, at (608) 745-5470 to learn more about Air Gapped Backup Services.
