

Cybersecurity Assessment

Protect your school district from the financial, instructional, and reputational damage caused by cyber incidents, like learning and data loss. CESA 5 offers a comprehensive cybersecurity assessment to help.

We'll review your current security status by identifying priorities and projects to reduce your risk and strengthen your incident response. Depending on your needs, timeline, and readiness, we can complete this process in just a few hours. You'll gain valuable insights and actionable recommendations. Ultimately, we'll help you create a more secure learning environment for both students and staff.

Features:

- An assessment focused on K-12 schools.
- A well-designed web portal to establish a baseline, determine priorities, and track progress.
- Helpful and insightful reports to share with stakeholders.
- Easily assign and track tasks.
- Assessment control alignment with respected standards like the NIST Cybersecurity Framework.
- Upload evidence and record notes in support of each control's current status.

Benefits:

- **Risk Identification and Mitigation** - Cybersecurity assessments proactively address weaknesses.
- **Financial Protection** - School districts can help avoid costs and protect their financial resources by identifying and addressing vulnerabilities early.
- **Reputation Management** - Cybersecurity assessments and security measures protect data and build trust.
- **Improved Incident Response Capabilities** - The assessment process helps school districts develop and improve their incident response capabilities.
- **Regulatory Compliance** - A cybersecurity assessment can ensure that school districts meet regulatory requirements and standards, reducing legal risks and potential penalties.
