

INFORMATION TECHNOLOGY INFRASTRUCTURE AUDIT

A comprehensive examination of your district's IT policies, resources, and operations to evaluate your infrastructure's health and condition, and to identify any vulnerabilities, inefficiencies, or non-compliance with regulatory standards.

FEATURES

- Provides an independent third-party review
- Assesses various components of an organization's IT environment, including hardware, software, network architecture, data management, security protocols, and IT policies
- A review of infrastructure documentation and diagrams.
- Interviews with key IT personnel and stakeholders
- Technical assessments using automated scanning tools
- Manual inspections of systems and configuration
- Log analysis and performance metrics

BENEFITS

- Identifies vulnerabilities and risks
- Improves efficiency and performance
- Enhances data security
- Enables cost savings
- Supports business alignment
- Improves disaster recovery and business continuity
- Increases stakeholder trust
